

## Team Plan

Git URL: <https://github.com/navsaini/NK-Messenger>

Work done by Nav:

- Implemented the chat boxes UI that allow each user to type and send messages
- Implemented code that allows chat boxes to dynamically appear based on the number of people currently on the server
- Designed and coded the flow of data from a client to the server and then back to another client
- Wrote the functionality that sends a message when the “Send” button is pressed

Work done by Kausthub:

- Wrote the functionality that sends a message when “Enter” is pressed
- Developed the UI that asks and submits the name of each user upon launching the Chat
- Designed the Conversation class that allows each Client and each chat box to have a sender and receiver field that allows the server to determine if the message should be sent to all members or the chat room or to a certain individual
- Wrote error checking capabilities for certain Text Fields to ensure exception were caught and incorrect data was filtered
